## Installation Instructions

### New Install - **Please Read**

After expanding the zip file, drag the ooSooMpro folder into your Applications folder (Macintosh OSX) or Program Files folder (Windows). You can actually put the folder wherever you like, the above locations are only recommendations. To run the program double click the ooSooMpro.app file (Macintosh OSX) or ooSooMpro.exe (Windows).

### Upgrade - **Please Read**

Close ooSooMpro if it is running. After expanding the newly downloaded zip file, open the folder that is revealed and drag the **all the files** into your **existing ooSooMpro folder**. When prompted, confirm that you wish to overwrite the existing file(s).

### **1.3.0: Released 15th February 2011**

Heading and Category names are no longer converted to Titlecase  
Default Install now setups up the database into the Documents folder

### **1.2.4: Released 25th January 2011**

Window redraws are now faster on Windows  
Window sizes are now optionally saved on exit - using Preferences  
Small Bug Fixes

### **1.2.2: Released 4th January 2011**

Properties window no longer automatically opens and closes, it now defaults to open  
Increased the transparency on the Properties window  
Smaller executable due to more efficient compilation

### **1.2.0: Released 27th November 2010**

User Interface Enhancements, particularly for Windows 7  
Vault and Task lists - now 'Middle Wheel' scrollable  
Vault and Tasks lists - Faster  
Vault and Tasks lists - Item Count shown  
Documents can now be directly attached to Task Items  
Clear Buttons Removed
